TIG Welding - Beginners Guide - Setting the Amperage On the most basic of TIG welders there will be an amperage control, too little amperage and you will not melt the metal, too much and you make a hole. Mr TIG recommends around 65 amps for 16 gauge steel (1.63mm). So a bit more for thicker stuff, and a bit less for thinner stuff, remember that the maximum amperage you can use will be limited by the diameter of the tungsten you are using. 1.6mm tungsten will go up to around 90 amps, if you ...
