Human Genome The Human Genome Project (HGP) formally began in 1990 and was finished in 2003. The goal was to discover the DNA sequences for all of the 20,000-22,000 genes that are found in human beings. This knowledge is vital for research into genetic disorders and possible genetic solutions to these disorders.

Chapter 14 Mendel and
the Gene Idea Lecture

Outline . Overview:

Drawing from the Deck
of Genes. Every day we
observe heritable

variations (such as

brown, green, or blue

eyes) among

individuals in a

population. These traits

are transmitted from

parents to offspring.

One possible

explanation for

heredity is a

“blending” hypothesis.
