The new Tekla Structures 2019 offers enhancements, improvements and new features to boost productivity and create smoother workflows. With enhancements for drawing production, rebar detailing, steel, cast-in-place and precast concrete, structural engineering design and collaboration, the latest version of Tekla Structures is intended to make your work easier and faster.

### Tekla 2019

Tekla Structures The most developed Building Information Modeling software on the market. It makes possible accurate, constructible modeling of any structure regardless of its size or material.

### For Businesses | Tekla Download

Tekla Structures is the most constructible structural software for BIM. With it, you can create, combine, manage and share accurate multi-material 3D models full of construction information. You can use Tekla Structures for design, detailing and information management from conceptual planning to fabrication and construction on site.
