Cat Engine Sensors | Vander Haag's
When the engine shut down, the temperature gauge showed 220 degrees and an Engine Warning light came on. After replacement of the fan motor and controller, the temperature gauge shows about 195 degrees when driving during the coolest time of the day between 55-65 mph.

High Temperature Reading (Cat C9) - Country Coach Forums
Coolant sensors measure engine operating temperature, which can be used to adjust the fuel ignition and timing. Allowing more fuel when the engine is cold or less when the engine is warm, and assisting with electric fan switches. 28 results TopSeller: High to Low

Buy genuine Perkins water temperature sensors | Perkins
Use your engine serial number and look up the sensor part numbers on a cat parts web page to make sure. The sensors usually use an o-ring seal. If the gauges use a dedicated sensor, after locating the sensor check the connections, after that you would need to try and get a resistance temperature chart if a restive sensor was used and or wiring digram.

Low temperature readout on CAT C7 gauge
The coolant temp sensor for the engine ECM has three wires and reports to the ECM. The other sensor reports to the gauge on the dash.

On a cat 3406e where is the coolant temp sensor located
Restore reliable, accurate coolant temperature readings with Dorman's Engine Coolant Temperature Sensor. This direct replacement sensor relays an electrical signal to the vehicles computer to show the engines coolant temperature. Direct replacement for a proper fit every time Replacement of a failed sensor restores proper gauge function
