The general one-line formula to linearly rescale data values having observed min and max into a new arbitrary range min' to max' is $\text{newvalue} = (\text{max}' - \text{min}') / (\text{max} - \text{min}) * (\text{value} - \text{max}) + \text{max}'$ or $\text{newvalue} = (\text{max}' - \text{min}') / (\text{max} - \text{min}) * (\text{value} - \text{min}) + \text{min}'$.
